

Identifying Training and Development Need, Designing Training Programs

Need and Importance of Training

The need for training of employees arises due to the following factors:

(i) Higher Productivity:

It is essential to increase productivity and reduce cost of production for meeting competition in the market. Effective training can help increase productivity of workers by imparting the required skills.

(ii) Quality Improvement:

The customers have become quality conscious and their requirement keep on changing. To satisfy the customers, quality of products must be continuously improved through training of workers.

(iii) Reduction of Learning Time:

Systematic training through trained instructors is essential to reduce the training period. If the workers learn through trial and error, they will take a longer time and even may not be able to learn right methods of doing work.

(iv) Industrial Safety:

Trained workers can handle the machines safely. They also know the use of various safety devices in the factory. Thus, they are less prone to industrial accidents.

(iv) Reduction of Turnover and Absenteeism:

Training creates a feeling of confidence in the minds of the workers. It gives them a security at the workplace. As a result, labor turnover and absenteeism rates are reduced.

(vi) Technology Update:

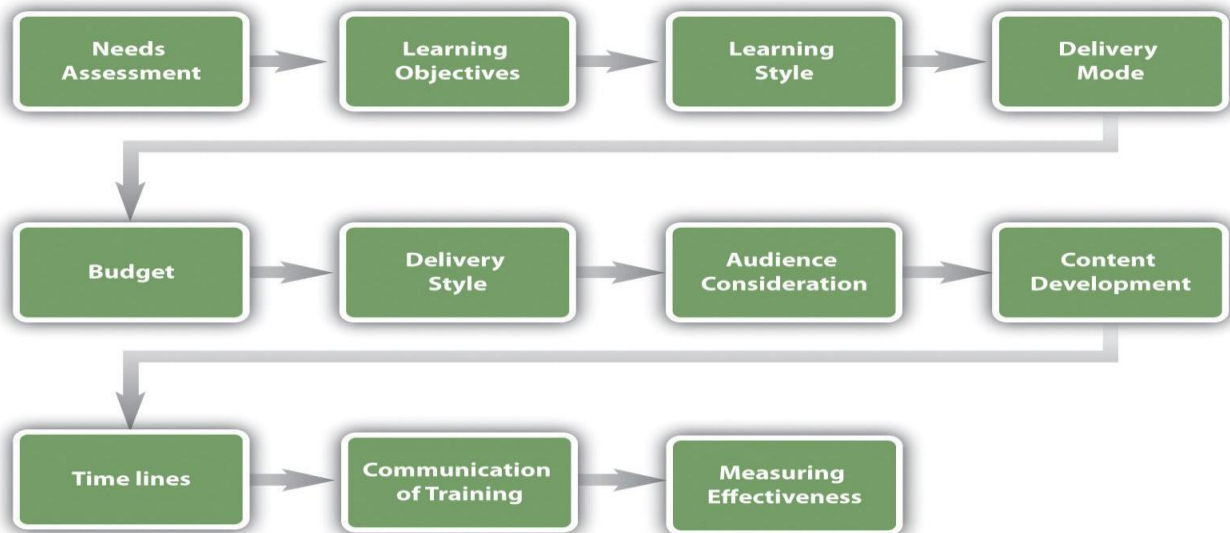

Technology is changing at a fast pace. The workers must learn new techniques to make use of advance technology. Thus, training should be treated as a continuous process to update the employees in the new methods and procedures.

(vii) Effective Management:

Training can be used as an effective tool of planning and control. It develops skills among workers and prepares them for handling present and future jobs. It helps in reducing the costs of supervision, wastages and industrial accidents. It also helps increase productivity and quality which are the cherished goals of any modern organization.

Designing a Training Program

When developing your training plan, there are a number of considerations. Training is something that should be planned and developed in advance.

The considerations for developing a training program are as follows:

- 1. Needs assessment and learning objectives.** This part of the framework development asks you to consider what kind of training is needed in your organization. Once you have

determined the training needed, you can set learning objectives to measure at the end of the training.

2. **Consideration of learning styles.** Making sure to teach to a variety of learning styles is important to development of training programs.
3. **Delivery mode.** What is the best way to get your message across? Is web-based training more appropriate, or should mentoring be used? Can vestibule training be used for a portion of the training while job shadowing be used for some of the training, too? Most training programs will include a variety of delivery methods.
4. **Budget.** How much money do you have to spend on this training?
5. **Delivery style.** Will the training be self-paced or instructor led? What kinds of discussions and interactivity can be developed in conjunction with this training?
6. **Audience.** Who will be part of this training? Do you have a mix of roles, such as accounting people and marketing people? What are the job responsibilities of these individuals, and how can you make the training relevant to their individual jobs?
7. **Content.** What needs to be taught? How will you sequence the information?
8. **Timelines.** How long will it take to develop the training? Is there a deadline for training to be completed?
9. **Communication.** How will employees know the training is available to them?
10. **Measuring effectiveness of training.** How will you know if your training worked? What ways will you use to measure this?
